

## CHEM-1094 NOMENCLATURE PRACTICE

1. Chlorous acid
2. Hydrogen iodide
3. Copper (I) oxide
4. Mercury (II) bromide
5. Phosphorous acid
6. Iron (II) carbonate
7. Periodic acid
8. Nickel (II) nitrite
9. Cobalt (II) nitrate
10. Chromium (III) phosphate
11. Hypobromous acid
12. Hydrosulfuric acid
13. Manganese (II) chlorite
14. Tin (IV) oxide
15. Calcium carbonate
16. Lead (II) iodide
17. Copper (II) sulfide
18. Aluminum oxide
19. Silicon tetrachloride
20. Carbonic acid
21. Dinitrogen tetroxide
22. Barium dihydrogen phosphate
23. Nitric acid
24. Potassium sulfate
25. Carbon disulfide
26. Hydrogen chloride
27. Phosphorous pentachloride
28. Ammonium perchlorate
29. Iron (III) oxide
30. Potassium hydrogen carbonate
31. Potassium dichromate
32. Potassium permanganate
33. Bismuth (III) oxide
34. Silver nitrate
35. Dichlorine heptoxide
36. Potassium sulfate
37. Sodium sulfite
38. Uranium hexafluoride
39. Perchloric acid
40. Mercury (I) iodide
41. Phosphoric acid
42. Calcium hydroxide
43. Nitrous acid
44. Sodium acetate
45. Carbon monoxide
46. Iron (II) sulfite
47. Sulfuric acid
48. Nitrogen tribromide
49. Sulfur hexafluoride
50. Tin (II) nitrate
51. Magnesium nitride
52. Barium sulfate
53. Ammonium phosphate
54. Calcium iodate
55. Bromic acid
56. Sodium cyanide
57. Lithium hypoiodide
58. Sulfurous acid
59. Krypton difluoride
60. Ammonia
61. Hydrochloric acid
62. Xenon tetrafluoride
63. Silicon dioxide
64. Sodium phosphate
65. Lead (II) sulfide
66. Sodium chromate
67. Aluminium hydride
68. Mercury (I) phosphate
69. Gold (III) cyanide
70. Dihydrogen sulfide
