

CHEM-1105

NOMENCLATURE PRACTICE-I

1. Chlorous acid
2. Copper (I) oxide
3. Mercury (II) bromide
4. Phosphoric acid
5. Iron (II) carbonate
6. Perbromic acid
7. Nickel (II) nitrite
8. Chromium (III) phosphate
9. Dihydrogen sulfide
10. Manganese (III) chlorite
11. Tin (IV) oxide
12. Calcium fluoride
13. Nitrogen triiodide
14. Nitric acid
15. Lead (II) chloride
16. Copper (II) sulfate
17. Aluminum oxide
18. Ammonium carbonate
19. Silicon tetrachloride
20. Calcium dihydrogen phosphate
21. Potassium sulfite
22. Sodium nitrite
23. Mercury (I) chloride
24. Barium hydroxide
25. Sulfuric acid
26. Phosphorous pentachloride
27. Magnesium nitride
28. Lithium hydride
29. Hydrosulfuric acid
30. Tin (IV) sulfide
31. Dinitrogen trioxide
32. Hypochlorous acid
33. Sodium acetate
34. Zinc carbonate
35. Silver nitrate
36. Perbromic acid
37. Strontium phosphate
38. Sulfur trioxide
39. Xenon tetrafluoride
40. Boron trihydride
