There are no upcoming events
Go to calendar...

2. From the list of activities, click "**External Tool**" and add it to your course.

External tool
☆ ❶

3. You can set the **Activity Name** to anything you'd like, this is what students would see and click on to access the activity.

4. Click the option for "**Preconfigured Tool**" to open a drop-down menu. From this menu, click the **"Hypothesis"** option.

5. Scroll down to the "**Restrictions**" heading and click on it.

▼ Restrict access ⟵ *1.*

Access restrictions

None
Add restriction... ⟵ *2.*

6. **Click** "**Add Restriction**". From the options available, **click** "**Grade**" to set up a restriction based on the grade received from the consent form.
   (***Note:*** *While it is basing the restriction off of a grade, the quiz itself should automatically be weighted as 0% and will not affect students grades if it was downloaded from this article. You can confirm that it is weighted as 0% by viewing your **Gradebook Setup**.*)

7. Ensure your restriction is set up where students **Must match** a **Greater than or equal to** grade of **100** in the **Hypothesis Consent** quiz.

Restrict access

Access restrictions

Add a "Grade" restriction and ensure your settings match this image

Student [must ◆] match the following

👁   Grade [Hypothesis Consent ◆]

☑ must be ≥ [100] % ✕

☐ must be < [   ] %

Add restriction...

8. Scroll to the bottom of the page and click "**Save and Return to course**"

9. You should now see a restriction added to your Hypothesis activity on your main course page. You can verify whether students are restricted from using the activity by switching your role to a student and attempting to use it (Click your name in the top-right corner, Switch role to, Student).

10. Restrictions must be configured this way for each Hypothesis activity that is added to a course. The Hypothesis Consent quiz only needs to be added to a course once.
